(54) ADVERTISEMENT CURTAIN BODY AND MANUFACTURE THEREOF

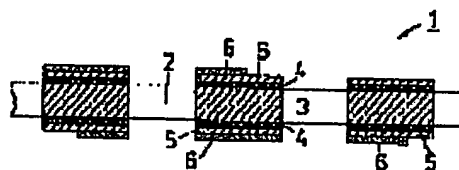

(57) Abstract:

PROBLEM TO BE SOLVED: To suppress an advertisement curtain body from being turned up by a wind in the case of being used for a hanging curtain or the like by releasing the wind even in the case of receiving the wind.

SOLUTION: In this curtain body, a base material 3 is made of a mesh body and many coating layers 4, 5 and 6 are respectively formed on both surfaces. An outermost layer 6 consists of the coating layer obtained by spraying a paint after sticking a masking material on

both surfaces. Also, after coating the paint on both surfaces of the mesh main body being the base material, the masking material is stuck to both surfaces, the spray coating is executed by the paint of a color different from the previous paint by an airgun further, thereafter the masking material is removed.
